

LIMA GETS UPGRADE ON ELECTRIC POWER

Western Line Builders from Twin Falls, ID and Wells, NV have been busy in Lima for several months. Contracted by Vigilante Electric, they are upgrading the whole electrical transmission system in Lima.

The 4 man crew of Tom Dilulo, Foreman, Kyle Smith, Lead Lineman, Mike Mullikan, App Lineman and Colton Moore, head App Lineman have been replacing poles, cross arms, transformers, wire and installing new LED street lights. The lights are a lot more economical and light up a larger area.

Tom said that some poles were put in in 1947. Most were in the 1950s and 60s. Some of the copper wire was actually rusted, which you don't see very often with copper wire.

They have worked through heat, rain, snow and wind, lots of wind and hope to finish up the first part of December. They have also used their bucket trucks to do a little community service around Lima, and for Lima residents.

THANK YOU TOM AND YOUR CREW FOR A JOB WELL DONE!!!! Lima Mayor, David Olsen
