Vigilante Electric Cooperative (VEC) has contracted Western Line Builders to do live line maintenance on our system at distribution and transmission voltages for the past five years. Additionally, they have built 5.2 miles of new 115 kv transmission line and 12.5 miles of 69 kv transmission line and 5 miles of distribution line.

Western line Builders have worked in every type of terrain and weather conditions that our system has to offer and have done so in an efficient, safe and professional manner.

I highly recommend Western Line Builders to anyone looking for a top notch line construction contractor.
